## CAREER OBJECTIVE

I am seeking a career opportunity that not only enables me to acquire hands-on experience but also empowers me to enhance my programming skills. My objective is to contribute to a dynamic and collaborative work environment where I can leverage my knowledge effectively. I am eager to engage with challenging projects and continue my professional growth as a programmer.

## EXPERIENCE | PROJECTS

Junior Software Developer, with intermediate experience working with JavaScript, .NET, React, Expressjs.

Software development using up-to-date technologies and agile methodologies. Active participation in the entire software development cycle from requirements analysis to testing, implementation and deployment.

- Developed an appointment-taking application with pagination, integrating API functionality to display real-time health news.
- Led the creation of a desktop application that combines a text editor with basic paint features, showcasing versatile programming skills.
- Collaborated in the development of an elementary school management system using Node.js, Express, and Handlebars, contributing to a seamless user interface and robust functionality.
- Successfully implemented a To-Do application using the MERN stack, demonstrating expertise in full-stack development.
